

ANWB Medical Air Assistance is the HEMS provider in the Netherlands, operating 6 x Eurocopter EC135 helicopters. Due to our operations in a rather salty and sandy environment we protect our helicopters with the A-Glaze product. Washing of the helicopters is far more easy to perform compared to the period in which our helicopters were not glazed, and the yellow lacquer remains in good condition. Every two years we re-glaze the helicopters in order to keep them protected.

If you want to know more about our experiences with the A-Glaze product, please feel free to contact us!

Best regards,

A handwritten signature in black ink, consisting of a stylized 'R' followed by a horizontal line that loops back under the 'R'.
